## SWEDBOARD®

We are delighted to announce that Print Solutions have been appointed as exclusive distributors of Swedboard products in Ireland. We will stock, distribute and promote this superb and innovative range of paperboard rigid substrate boards manufactured in Sweden.

Swedboard produce 3 major ranges of substrate and all have the same high quality SB surface liners giving you a unique consistency when producing POS and display structures and products. The cores are manufactured in a unique process giving the advantage of dust free products when printing, cutting and assembly on site.

The SB premium surface liners also prevent cracking when cutting and bending in any direction whilst also eliminating the need for lamination or varnishing. Add to this the benefit of all boards being FSC certified and food complaint you have a winning combination not seen previously in a family of print and fabrication substrates.

All of these boards also bring true environmental advantages being totally PVC free, manufactured using the most efficient use of raw materials together with being lightweight for reduced transport costs.

## INNOVATIVE PRODUCT RANGES

All 3 ranges have been produced with the same high-quality SB liners so each range compliments each other to give both consistent whiteness and high quality aesthetics in multi component displays. All SB liners are made from sulphate solid bleached, virgin fibre board. All 3 products have the advantage of being dust free and can be fabricated without cracking.

Available in a range of large format sizes and complimented with a full range of fixing accessories including: Screws, Screw Hooks, Edging Strip, Feet, Shelf and Merchandising Hooks.

Print Solutions will stock the Swedboard ranges in depth and offer a nationwide delivery service for full pallet orders across Ireland.

Please contact our sales office for further information, pricing or samples of the Swedboard range.

We are confident when you try these new and innovative products, they will form a welcome and truly environmentally friendly addition to the product portfolio you offer your client base.

### SB Fibre

#### Structured Paperboard

A premium quality rigid structured paperboard suitable for volume production of complex 3D structures and for use in the retail, display and exhibition industries. SB Fibre is not a standard honeycomb board. It is manufactured using a unique process that gives several advantages over the honeycomb production method including a dust free core when cutting and added strength. All SB Fibre products are constructed with premium quality SB liners.

Stock Availability:

- SB White Liners with Brown Core
- SB Brown Liners with Brown Core
- SB White Liners with White Core
- SB White Liners with Brown Core with Organic Fire Retardant Protection

### SB Composite PREMIUM

#### PVC Free Foam Centred Board

The ultimate board for high end lightweight usage. SB white liners combine with a white PVC free foam middle. Available in 5mm, 10mm through to a 40mm thickness for the production of stunning displays.

### SB Solid PREMIUM

#### Two Sided Display Board

A double sided 1mm board with SB liners both sides to give consistent whiteness and convertibility.

STRUCTURED PAPERBOARD

SUPERIOR  
PRODUCT TO  
TRADITIONAL  
HONEYCOMB  
CENTRED  
BOARD

**We take Structured Paperboard to a totally new dimension, in every way!**

**INNOVATIVE BOARDS  
THAT HELP THE WORLD  
TO BECOME MORE ENVIRONMENTALLY  
FRIENDLY**

- Up to 2500mm Width
- Dust Free
- No Cracking When Bending
- Customised Production
- FSC Classified and 100% recyclable
- 100% Food Compliance
- Best Rigid Paperboard for 3D Construction
- New Possibilities with Z-Endless Board! (Longer Lengths)

**The board is 100% recyclable & FSC certified with negative CO<sub>2</sub> emissions. Almost no waste of raw material in production of the boards.**

Customised production gives the printer and converter minimal waste. The core is manufactured in a new unique way different from standard honeycomb production which gives the advantage of dust free boards. No more dust while printing and cutting or during assembly on site.

No cracking in any direction while bending in fabrication.

We are able to produce not only special formats but also customised colours on the print layer, that fits your customer's needs!

All of this makes SB Fibre not only the most innovative and creative board for both volume print and 3D constructions, but also, the best choice for our common environment!

#### **FSC Classified and Made in Sweden**

All our boards are produced in Katrineholm, Sweden. The boards are FSC classified and all the paper raw material is made out of controlled wood. This is extremely important to us and our customers.

FOAM CENTRED BOARDS

The Ultimate Lightweight Board for Many Uses

INNOVATIVE BOARDS  
THAT HELP THE WORLD  
TO BECOME MORE ENVIRONMENTALLY  
**FRIENDLY**

- Completely White
- Up to 2500 Width
- Light Weight & Stiff
- No Cracking When Bending
- PVC Free
- 80% Fibrebased Paper (5mm)
- Indoor & Short Term Outdoor Use
- Can be Incinerated in an Environmentally Friendly Manner Due to the Non PVC Polystyrene in the Core, Turning to Water and Evaporating.

The SB Composite board is made with a core that contains mostly air (97%) and 3% Polystyrene. It's light, flat and stiff with a unique SB surface layer. It's easy to work with and a very good choice for our common environment!

The SB print layer doesn't crack in any direction which makes it very suitable for 3D construction. SB Composite Premium has a special surface layer which makes the board extra strong and waterproof so that the board can be used both indoors and outdoors. SB Composite can be finished on traditional digital cutting tables at full speed and the 5mm board can also be finished in traditional die cutting machines.

SB Composite Premium is manufactured in 5 through to 40mm thickness and up to 2500 mm width. We can easily customise formats to minimise waste, when printing/converting larger volume jobs.

#### FSC Classified and Made in Sweden

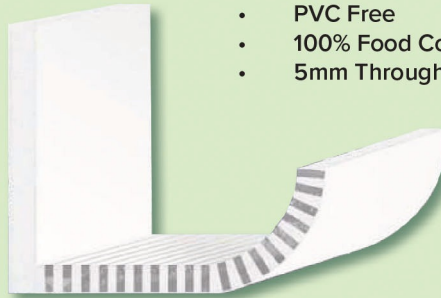

All our boards are produced in Katrineholm, Sweden. The boards are FSC classified and all the paper raw material is made out of controlled wood. This is extremely important to us and our customers.

# SB Solid PREMIUM

TWO SIDED DISPLAY BOARD

**We take the Solid Paperboard to New Formats and New Possibilities!**

**INNOVATIVE BOARDS**  
THAT HELP THE WORLD  
TO BECOME MORE ENVIRONMENTALLY  
**FRIENDLY**

- 1mm Thickness
- Completely White
- Up to 2500mm Width
- No Cracking When Bending
- 100% Food Compliance
- 100% Recyclable
- Negative CO<sub>2</sub> Emissions
- PVC Free
- FSC Approved
- Excellent for 3D Construction

## **SB Solid Premium is 100% recyclable**

The SB Solid Premium can be recycled as paper in normal wastepaper streams, which is common everywhere throughout the world.

SB Solid Premium has a negative CO<sub>2</sub> emission footprint, so once again, this is a very good choice to help our common environment to a better future!

## **FSC Classified and Made in Sweden**

All our boards are produced in Katrineholm, Sweden. The boards are FSC classified and all the paper raw material is made out of controlled wood. This is extremely important to us and our customers.

## **100% Food Compliance**

The SB Solid Premium is 100% food compliant with food that is dry, fatty, aqueous, acidic, & also for alcoholic beverages.

## **Great Choice for Creativity**

We produce the product in large format, which gives the global large format printing industry new possibilities for production and also enables large construction of displays from a single sheet.

# SWEDBOARD® TWO SIDED DISPLAY BOARD

We take the solid paperboard to a new dimension in many ways. Perfect to print on and easy to convert for different constructions, both in digital cutting machines and traditional die cutting machines.

We produce the boards up to a width of 2500mm, which gives constructors the possibility to make larger constructions from every sheet.

SB Solid Premium has an excellent surface that doesn't crack in any direction when bending it. The sealing of the print liner gives the benefit of not having to laminate or varnish the surface, in order to protect it. The sealing of the surface makes SB Solid Premium work very well in humid

environments and the surface can handle both heat and cold. It's also certified for contact with food.

### Environmentally Friendly and Sustainable

The solid paperboard is made of 100% virgin fibre that is oriented in a new way, which gives the benefit that it doesn't crack in any direction. This combined with the sealing of the print liner, results in the positive properties described.

We produce the boards efficiently, with an extremely small amount of waste, approximately 97% of all raw material are used when the boards are made.
