## ***Fix It, Move It & Reuse It***

Use Kwik-Fix discs to attach signs to external and internal posts. Simply apply the self-adhesive pad to the back of your sign and use a cable tie to secure the sign in place.

Each disc is exceptionally strong and can hold in excess of 4kg - its mechanical strength ensures that it can withstand tough weather conditions. The sign can be reused time and time again.

Ideal for customers in the following industry sectors: Event/Festivals, Retail, Construction, Health & Safety and Signage.

### **Product Description**

75mm Self-Adhesive Disc, moulded to fit to most posts, fixing channel allows up to 16mm wide cable tie, screw hole if required.

### **Application Instructions...couldn't be simpler!**

- Ensure the back surface of the sign is clean, grit & grease free
- Remove liner from pad and apply to the back of the sign, using pressure
- Allow 24hrs for a 90% bond
- Fit to post using cable tie or Back-to-Back Hook & Loop threaded through the 16mm wide fixing channel

### **High Performance Acrylic Adhesive that you can trust!**

Proven to bond well to various rigid sign materials including Dibond, wood, glass, acrylic, Foamex and other composite materials. Designed to hold significant weight, long-term, externally.

**Increase Spend** - Can be supplied to Trade and End Users

**Help the Environment** - The same sign can be used over and over again in different locations
