Sheets and building profiles 2022

KÖMMERLING®

Passion,

Precision and the claim of being better

The name KÖMMERLING is known all over the world. Since it was founded in 1897, this traditional company has been steering a course of constant progress. As one of the successful brands in the large profine Group, the KÖMMERLING Sheets offers a comprehensive range of PVC sheets for the most diverse applications.

For instance, the top quality and impressive properties of our sheets are greatly appreciated in the advertising, stand design, building, and industrial sectors. Thanks to their long life, easy care, and vast potential, KÖMMERLING sheets have made an indelible mark on the sector. The KÖMMERLING Sheets and its extensive portfolio simply deserve to lead this segment. KÖMMERLING and its products enjoy a high reputation among customers, not only because of their product quality or extensive range. What drives us is our pursuit of "the better". This spirit can be felt at all of our divisions. It is our daily motivation to go new ways with our customers and to surprise the market with new products, systems, services, and sales channels. Always endeavouring

to keep on the move, to make the good even better, and by doing so to safeguard its customers' sustainable success. We call this quite simply the **"EVER BETTER PRINCIPLE"**.

Hallmarks:

Highest quality, versatile services, and great expertise in PVC sheet production – the following profine sheets have been awarded the pro-K quality seal: KömaCel, KömaTex, KömaPrint, KömaDur, and KömaDeco.

With a good conscience – recycling and reuse

To us, sustainability means the attentive handling of the markets' and our customers' needs. Accordingly we assign a central role not only to ecology, but also to economic aspects. Supported by our sustainability principles, we create new opportunities for our customers. All KÖMMERLING sheets are characterised by an effective CO2 balance. Our goal is to provide our customers with perfected ecological and cost effective solutions that create trust sensibly and responsibly – with a clear conscience.

There are no toxic or harmful substances in KömaCel, KömaTex, KömaPrint and KömaDur that can be given off over the long term. KömaCel, KömaTex, KömaPrint and

KömaDur are free from formaldehyde, asbestos, lindane, PCB, PCP and CFCs. What's more, they are cadmium and lead-free and are also made without any monomers, biocides or plasticisers.

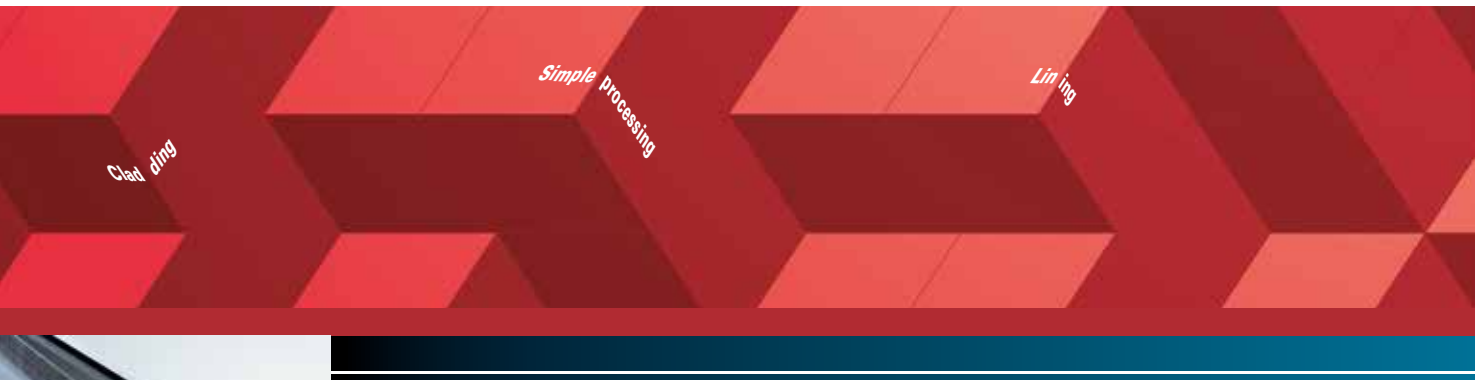

This is why KömaCel, KömaTex, KömaPrint and KömaDur pose absolutely no hazard to people or the environment, neither during their manufacture, while in use, nor during the recycling process. Old sheets no longer in use or left-over sections of sheets can be recycled without any problem: they are ground up in shredders and cutting machines before being returned to the production process to make new sheets. This closed material cycle is not only economical, but ecological, too.

You have the tasks. We the range.

	KÖMACEL®	The universal integral skinfoam sheet for advertising, building and industry	
	KÖMATEX®	The multiflexible free skinfoam sheet for advertising	
	KÖMAPRINT®	The innovative sheet for the best printing results	
	KÖMADUR®	The PVC-U sheet system for virtually all areas	
	KÖMACEL® AB KÖMADUR® AB	Antibacterial ceiling and wall cladding	
	KÖMALU®	The aluminium composite sheet for indoor and outdoor applications	
	KÖMASTEEL® KÖMASTEEL® WHITEBOARD	The hard, bend-resistant steel composite sheet for a wide range of applications The high-gloss steel composite panel for special applications	
	KÖMASTYLE	The ideal wall cladding system for modern interior design	
	KÖMAPAN®	The original among the profiles

KÖMACEL®

**The universal integral skinfoam sheet
for advertising, building, and industry**

This owes its unique product properties to the strong, solid cover sheet combined with a celled core of the same material. KömaCel is the world’s Number One in Celuka extrusion.

The surface of the strong, smooth outer cover lends the sheet its silky gloss effect. It is therefore ideal for screen printing and lamination. Thanks to its good thermal and sound insulation values, it is also a familiar sight in the industrial and building sectors.

■ The applications

Advertising sector:

- Signs
- Banners
- Inscription panels
- Displays
- Shop window decorations
- Large lettering
- Exhibition and showroom stands

Building sector:

- Shop design
- Interior finishing
- Wet rooms
- Cladding
- Roller shutter boxes
- Opaque panel infills
- Door and window elements

Other:

- Model building
- Furniture industry
- Structured parts
- Photo lamination
- Traffic signs for construction sites
- Chemical and laboratory areas
- Ship, container, and vehicle interior fittings

■ The features

- Very good bonding
- Good printing qualities
- Good for laminating
- Good for painting
- Simple processing
- Good acoustic insulation

- Good sound insulation
- Low thermal conductivity
- Very good flexural strength
- Chemical and corrosion resistant
- Flame resistant (up to 10 mm Thickness)
- Weatherproof and Weather resistant

- Low water absorption
- Moisture resistant
- No swelling
- With glossy or matt surface
- 100 % recyclable

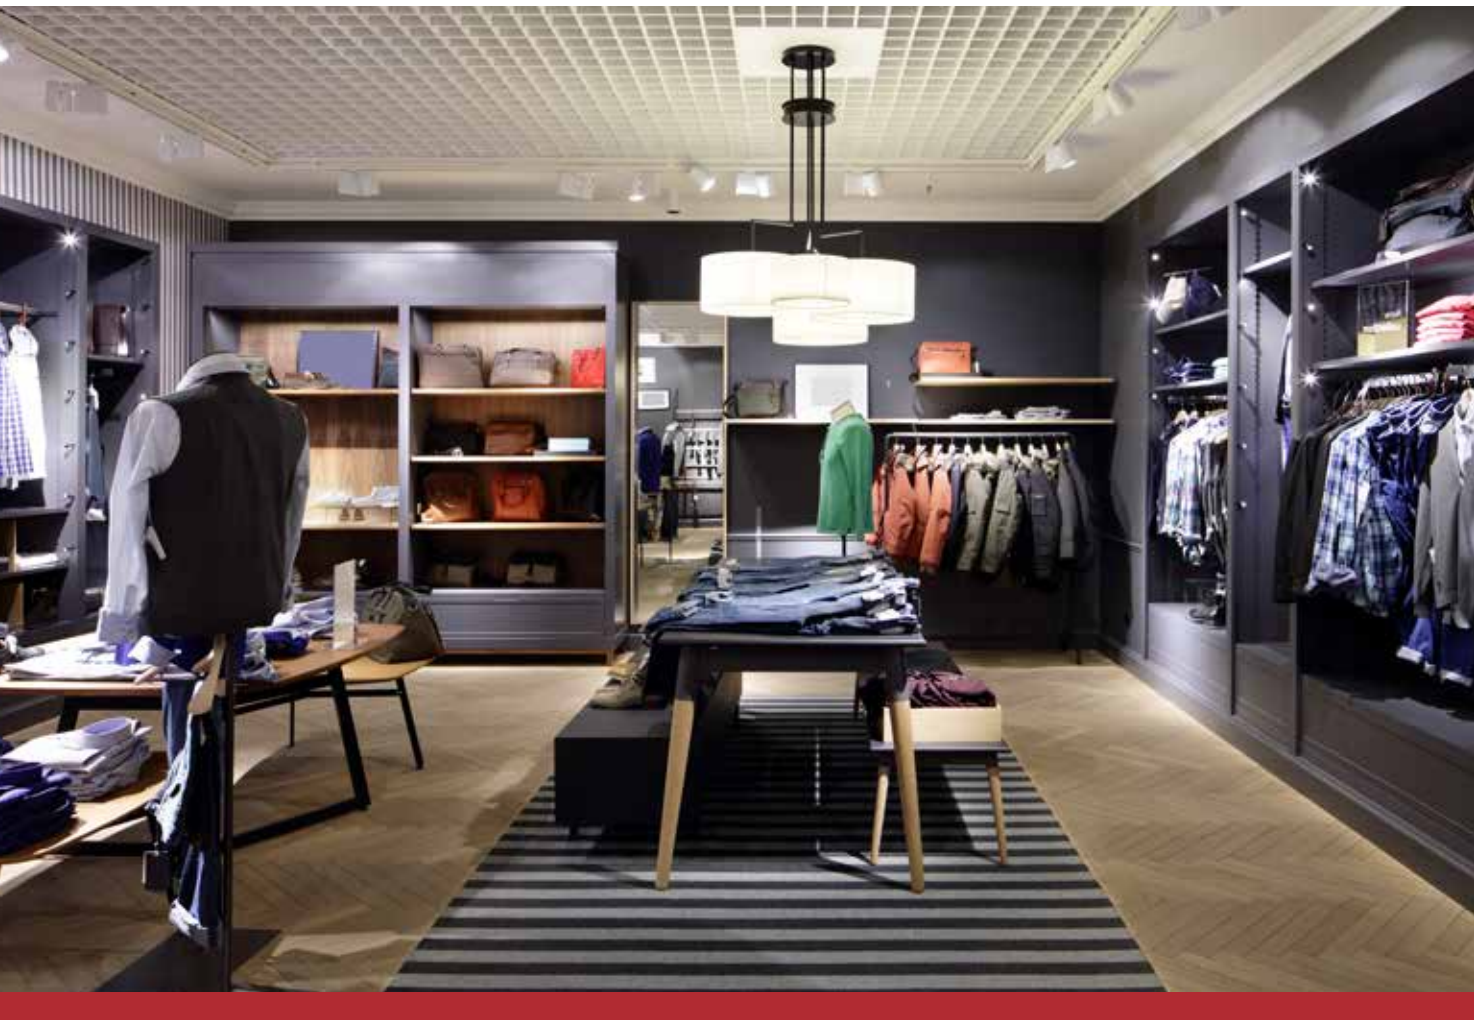

Hallmarks:
Highest quality, versatile services, and great expertise in PVC sheet production.

Consistency:

- Surface with silky gloss finish
- Solid, closed, smooth outer cover
- Fine-celled foam structure
- Homogeneous, moulded-in colour

KÖMATEX®

**The multiflexible free skinfoam sheet
for advertising**

The closed-cell, matt, finely structured, and therefore strong surface of KömaTex PVC free skinfoam sheet presents an optimal substrate for printing, painting, and laminating and is very easy to process and flame resistant to boot.

All this presents the best conditions for a great many applications – above all in advertising. In the colour White 662 similar to RAL 9003), the sheets are weatherproof and weather resistant, and therefore suitable for outdoor applications as well.

The applications

Advertising sector:

- Signs
- Banners
- Inscription panels
- Displays
- Shop window decorations
- Exhibition and showroom stands
- Digital printing
- Photo lamination

Building sector:

- Shop design
- Interior finishing
- Model building
- Traffic signs for construction sites

The features

Standard colours

				
White 662 similar to RAL 9003	Agate grey 140 similar to RAL 7038	Grey 191 similar to RAL 7037	Red 491 similar to RAL 3000	Green 591 similar to RAL 6024
				
Signal yellow 750 similar to RAL 1003	Yellow 791 similar to RAL 1018	Navy blue 850 similar to Pantone 288 C	Blue 891 similar to Pantone 300 U	Black 991 similar to RAL 9011

The colour White 662 is especially suitable for outdoors. Colour PVC sheets are not UV and weather resistant over protracted periods. The colours are suitable for indoors only.

KÖMAPRINT®

The innovative sheet for the best printing results

With KömaPrint, the printing and display manufacturing industries are given an innovative PVC material that is the ideal solution for all material property requirements.

The shining white sheet (similar to RAL 9003) and its finely textured surface promote an outstanding printed image. This stable, lightweight, yet moisture resistant sheet is also and equally suitable for indoor and outdoor applications.

The applications

Advertising sector:

- Digital printing
 - Screen printing
 - Photo lamination
 - Signs
 - Displays
- Banners
 - Lettering
 - Promotion
 - Shop window decorations

Other:

- Presentations
- Exhibitions
- Puzzles
- Decorations

The features

- Uniformly and finely structured surface
 - Fine-celled foam structure
 - Colour 667 bright white
 - Excellent printing qualities
 - Good for laminating
 - Very good for bonding
- Ideal for punching work
 - 100 % recyclable
 - Flame resistant
 - Simple processing
 - For reliable printing processes
 - Ideal for cutting, trimming, and sawing
- Lightweight
 - Moisture resistant
 - For internal and external applications

Hallmarks:
Highest quality, versatile services, and great expertise in PVC sheet production.

Consistency:

- Fine-celled foam structure
- Finely textured surface
- Lightweight
- Excellent printing properties

With our different variants, the KömaDur PVC-U sheet system fulfils even the most exotic requirements and is therefore an interesting solution for a great many applications and fields.

Thanks to their wide range of material properties and simple manufacture, the KömaDur variants are ideal for both indoor and outdoor applications – whether in the chemical industry, the building sector, electrical engineering, exhibitions, or advertising.

The applications

Advertising sector:

- Signs
- Displays
- Banners
- Inscription panels
- Exhibition and showroom stands
- Shop window decorations
- Digital printing

Building sector:

- Shop and interior finishing
- Zone of high humidity
- Air conditioning and ventilation elements
- Sandwich elements for wall and door panelling
- Cladding and panelling

Other:

- Deep drawn parts
- Machine building
- Apparatus and tank construction
- Electroplating technology
- Chemical and laboratory engineering
- Accumulators
- Photo industry

The features

-  Surface smooth glossy or matt on one side
-  Various white hues and colours as well as dark and light grey
-  Normal to increased impact resistance
-  Deep drawing properties
-  Suitable for welding
-  Grooved and embossed
-  Very good for printing (KömaDur D)
-  Good for laminating (KömaDur D)
-  Very good for bonding
-  Flame resistant
-  Chemical and corrosion resistant

-  Weatherproof and weather resistant
-  Protective film on one side
-  100 % recyclable

Hallmarks:
Highest quality, versatile services, and great expertise in PVC sheet production.

KÖMACEL® AB

KÖMADUR® AB

Antibacterial ceiling and wall cladding for advertising, construction and industry

KömaCel AB and KömaDur AB sheets offer active antibacterial protection and are designed for cladding the walls and ceilings of areas that must fulfil stringent hygiene requirements.

The sheets are resistant to many chemicals. KömaCel AB and KömaDur AB sheets satisfy the standards demanded by the health authorities for food plant, medical facilities, catering firms, and many other areas (DIN 22196:2011). The sheets' antibacterial properties offer protection against mould, bacteria, and pathogens. Our sheets use silver ions. These are a known biocide with natural antimicrobial and antiseptic properties that suppress microbial reproduction.

The applications

Public Areas

- Household kitchens
- Professional kitchens
- Catering
- Canteens
- Sports school pools
- Showers
- Laundries

Medical Areas

- Healthcare pools
- Laboratories
- Pharmaceutical areas
- Retirement and nursing homes
- Hospitals
- Operating rooms
- Mortuaries

Food Areas

- Food production
- Cold stores
- Clean rooms

Furniture industry

- Vehicle interior fittings
- Chemical and laboratory engineering
- Shop and interior finishing

The features

- Resistance to chemicals
- Active antibacterial protection
- Homogeneously distributed antimicrobial protection
- Elimination of microbes
- Long antimicrobial protection
- Antibacterial features remain even after processing
- Tested according to DIN ISO 22196:2011
- Food grade (KömaDur AB)
- Easy to clean
- Resistant despite frequent cleaning
- Impermeable, air- and watertight system
- Low maintenance
- Shock resistant
- Weldable
- Easy to install
- Very easy to bond
- Very good formability
- Flame resistant (KömaDur AB)

Overview of processing properties

Machining

Cutting, sawing, turning, filing, drilling, planing, milling, grinding, and screwing

Forming

Stretch drawing, deep drawing, vacuum drawing, blowing, bending, folding, and punching

Welding

Hot gas, heated tool, and folding welding

KÖMAALU®

**The aluminium composite sheet
for indoor and outdoor applications**

KömaAlu is an innovation composite material consisting of aluminium covers and a polyethylene core bonded together to form a resilient unit. The aluminium covers are then enamelled with a polyester paint system (coil coating).

The result is a lightweight, yet extremely durable and bend-resistant aluminium composite sheet. These outstanding product properties make KömaAlu composite sheets the ideal material for indoor and outdoor applications.

The applications

Advertising sector:

- Exhibition stands
- Supermarkets
- Shop window decorations
- Decoration elements

- Signs
- Pylons
- Photo lamination
- POS/POP

Building sector:

- Cladding
- Panelling
- Shop design
- Partitioning

The features

- 

Brilliant homogenous white
- 

Excellent printing qualities
- 

For internal and external applications
- 

High durability
- 

Good flexural strength
- 

100 % recyclable
- 

Weatherproof and weather resistant
- 

High corrosion resistance
- 

UV resistant
- 

Simple processing

KÖMASTEEL®

The hard, bend-resistant steel composite sheet for a wide range of applications

**KÖMASTEEL®
WHITEBOARD**

The high-gloss steel composite sheet for special applications

KömaSteel is an extremely bend-resistant steel composite sheet consisting of a polyethylene core sandwiched between two enamelled steel cover sheets.

Thanks to its ferromagnetic properties and its extremely hard and impervious surface, KömaSteel is the ideal sheet for a great many applications in the advertising and building sectors, e.g. perimeter board advertising, machine cladding, etc.

KömaSteel is also available in the product variant KömaSteel Whiteboard. This sheet stands out due to its high-gloss white surface and is ideal for applications in the advertising sector and industry.

The applications

Advertising sector:

- Displays
- Labelling systems
- Perimeter board advertising
- Whiteboards
- Shop fitting
- Trade fair and exhibition stands
- Interior panelling
- Signage

Building sector:

- Machine cladding
- Balcony sheets

Industry:

- Construction sector (panelling)
- Industrial production

The features

For internal and external applications

High bending strength

Hard and robust surface (KömaSteel)

Ferromagnetic*

Excellent digital printability

High-gloss surfaces on both sides (KömaSteel Whiteboard)

100 % recyclable

Punchable (KömaSteel)

Dirt-resistant

Ideal for use with plastic films (lettering)

*KömaSteel:
Use of magnetic foil
KömaSteel Whiteboard:
Use of magnetic signs and letters

Transportation, storage and handling

The panels are delivered with a protective foil that prevents damages to the decorative surfaces during transportation, storage and handling. Nevertheless, the composite panels need to be handled with care. Please keep the following suggestions in mind. Protect cut edges from moisture!

Consistency:

- Core consisting of Polyethylene
- Surface with stove-enamelled steel cover layer
- Ferromagnetic

KÖMASTYLE

The ideal wall cladding system for modern interior design

Discover the best selling points for renovation and refurbishment of your living spaces and damp locations. Large-area wall cladding saves you time and reduces joints – for both installation and care. In years to come, with KōmaStyle sheets, you can simply hide outdated wall areas and instead create smooth and seamless surfaces with a high-quality look. Damp rooms such as bathrooms can be significantly upgraded.

The hygienic surfaces are very easy to clean, since soiling and lime can hardly adhere at all. In terms of laminats and surfaces, there is a choice between the two product variants, KōmaStyle Deco and KōmaStyle D. The integral foam sheet of the KōmaStyle Deco series are coated with a decorative foil. A total of 22 timeless decors are available. Whether wood decor, plain or stone structure, there are hardly any limits to wall design. These decorative foils are particularly resistant and therefore well suited for use in damp rooms.

With KōmaStyle D, customers can not only choose between choose between two panel materials (integral foam sheets or aluminium composite sheets) but also in the structure of the board: granulated, wood or stone structure

The applications

- wall cladding in the bathroom
- shower wall panel
- sanitary and SPA facilities
- wall and ceiling cladding in interior finishing
- retail and trade fair construction
- alcove panels (e.g. for kitchens)
- restaurant and hotel construction

The features

- | | | |
|---|--|--|
|  Attractive colour laminate variants with a wood and stone finish as well as plain colours |  Scratch- and abrasion-resistant |  100% recyclable |
|  Simple manufacture |  Not susceptible to hairline cracks |  Quick to fix |
|  Can be machined with allwoodworking tools |  Easy to clean |  Lightweight |
|  Very good bonding |  Resistant to mould and termites | |
|  Moisture-resistant |  High durability | |
|  Chemical-resistant |  For indoor use only | |

KÖMAPAN®

The original among the profiles

The proven tongue and groove profiles from KÖMMERLING defy all external influences. Protected by weather and UV-resistant surface foils, the material retains its shape and weather resistance.

KömaPan is insensitive to wet, chemical environmental effects, UV irradiation, and pests. So it does not swell, peel, or fade. Due to these excellent material properties and a high degree of stability, the product offers a wide range of applications. Thanks to its extreme longevity and low maintenance, KömaPan is a low cost and high quality solution on a permanent basis.

The applications

- Yard gate paneling

– Privacy and noise control screens

– Filling for railing cladding z. e.g. balcony infill (observe state of the art)

– Façade and gable cladding
- Garden gate and front door paneling

– Roof shelter cladding

– Wall cladding

– Parapet cladding

The features

- Moisture resistant

High loading capacity

Weatherproof and weather resistant

UV resistant

Corrosion resistant

Light- and colourfast as defined in DIN ISO 105-A03

Low maintenance

Easy care

Easy to clean

Shock resistant and stable under pressure

Long service life

Dimensional stability

Good thermal insulation

Good sound insulation

Quality,

that is at home everywhere

KÖMMERLING is a successful brand under the umbrella of the owner-operated profine Group.

For instance, the KÖMMERLING Sheets is also committed to the quality claim that is lived and breathed throughout the Group. This is joined by joint power of innovation, high customer orientation, and – not least of all – responsibility to personnel and customers.

This recipe for success has made the KÖMMERLING Sheets and the Group a familiar name for twenty million satisfied customers in over fifty countries worldwide. This is because we see sheets not only as engineering products that must satisfy the highest precision criteria, but also as the solutions they offer our customers. For this reason, all of our experience and all of our passion is put into every product and every system from the KÖMMERLING Sheets.

“Thanks to our fast response times and our optimised, binding order processing operations, our customers can count on us.”

Quality you can sense

For many decades, KÖMMERLING has been synonymous with outstanding quality. This is based on our constant endeavours to offer new possibilities with new ideas and pioneering technology and hence to set new standards. Our customers benefit from this in the form of an extensive range that fulfils every wish and offers an ideal solution for all requirements. Hence quality at KÖMMERLING is not an empty promise, but a claim that is lived and breathed, examined every day, and constantly improved to become an attribute you can sense.

Service that creates trust

In this respect, we see KÖMMERLING Sheets and therefore profine not only as a supplier of high quality products, but also as an experienced provider of end-to-end solutions and a wide range of services. Accordingly, we are in close contact with our customers and so are fully familiar with their needs on the market. These include, for instance, the wish for smaller packaging units and faster availability. Supported by this array of quality, experience, advice, a fast delivery service, and appealing prices, we help you to find the optimal solution for your tasks. We'll also be pleased to advise you in the manufacture and optimal application of our sheets.
