

We take the solid paperboard to new formats and new possibilities!

The SB Solid Premium - 1mm thick solid paperboard,
100% recyclable & FSC certified with negative CO₂ emissions

We produce it in bigger formats which gives the global large format printing industry new possibilities when printing & it enables big constructions or displays from only one sheet!

Newbenefits

We take the solid paperboard to a new dimension in many ways. Perfect to print on and easy to convert to different constructions. Both in digital cutting machines and traditional die cutting machines. We produce the boards up to a width of 2500mm, which give constructors the possibility to make bigger constructions from every sheet.

SB Solid Premium has a very nice surface that doesn't crack in any direction when bending it. The sealing of the print liner gives the benefit of not having to laminate or varnish the surface, in order to protect it. The sealing of the surface makes SB Solid Premium work very well in humid environments and the surface can handle heat and cold. It's also certified for contact with food.

Environmentally friendly and sustainable

The solid paperboard is made of 100% virgin fibre that is oriented in a new way, which gives the benefit that it doesn't crack in any direction. This combined with the sealing of the print layer, results in the positive properties described above.

We produce the boards efficiently, with an extremely small amount of waste, approximately 97% of all raw material are used when we make the boards.

SB Solid Premium is 100% recyclable

The SB Solid Premium can be recycled as paper in normal wastepaper streams, which is common everywhere throughout the world.

SB Solid Premium has a negative CO₂ emission footprint, so once again, this is a very good choice to help our common environment to a better future!

FSC Classified and Made in Sweden

All our boards are produced in Katrineholm, Sweden. The boards are FSC classified and all the paper raw material is made out of controlled wood. This is extremely important to us and our customers.

100% Food Compliance

The SB Solid PREMIUM is 100% food compliant with food that is dry, fatty, aqueous, acidic, & also for alcoholic beverages.

We take the solid paperboard to new formats and new possibilities!

Good choice for the environment & creativity

The SB Solid Premium, 1mm thick solid paperboard is 100% recyclable, FSC certified with negative CO₂ emissions & 100% Food Compliant! We produce it in bigger formats, which gives the global large format printing industry new possibilities for printing and also enables to make big constructions of displays from only one single sheet.

TECHNICAL SPECIFICATION

Width in mm	1220, 1600, 2030, 2400, 2500 mm
Length in mm	1200 – 4200 mm
Thickness	1 mm
Weight / Liner grammage (g/m ²)	730 g
Tolerance in mm in length and width	+/- 2mm
100% Food Compliant	Dry, fatty, aqueous, acidic & alcoholic
