

**The PVC free Composite board
light weight, stiff &
totally white!**

WE MANUFACTURE
**INNOVATIVE
BOARDS** THAT BENEFIT
OUR COMMON WORLD
ENVIRONMENT

SWEDBOARD

- Completely white
- Up to 2500 width
- Light weight & stiff
- No cracking when bending
- PVC free
- 80% fibrebased paper (5mm)
- Indoor & outdoor use

The ultimate light weight board for many uses

The SB Composite board is made with a core that contains mostly air, 97%. It's light, flat and stiff with a unique SB surface layer. It's easy to work with and a very good choice for our common environment!

The nice white impression together with all other benefits gives the graphic industry opportunities to use the SB Composite board for a lot of different areas.

The SB print layer doesn't crack in any direction which makes it very suitable for 3D construction. SB Composite Premium has a special surface layer which makes the board extra strong and waterproof so that the board can be used both indoors and outdoors.

SB Composite can be finished in traditional digital cutting tables in full speed and the 5 mm board can also be finished in traditional die cutting machines.

SB Composite Premium are manufactured in 5-40 mm thickness and up to 2500 mm width. We can easily customize formats to minimize waste, when printing/converting larger volume jobs.

SB Composite PREMIUM
PRINT & CONSTRUCT

- SB surface layer Premium
- In- and outdoor use
- Excellent for 3D construction
- Extra strong
- PVC free
- 100% Food Compliance

Volume market & 3D constructions

Productivity, small amount of waist provide efficiency

No cracking with SB line

No cracking in either direction!
Use in temperature $-5^{\circ}\text{C} \rightarrow +100^{\circ}\text{C}$

ACCESSORIES

We have an innovative accessories assortment that we will continuously develop!

Z-Endless possibilities

The image shows a Z-Endless Board application, which is a long, continuous board used for a large-scale display of a mountain landscape. The board is divided into several sections, each showing a different part of the mountain. The text 'Z-Endless BOARD' is prominently displayed on the left side of the board.
