

# WW 300 Series

Fifteen years of creative architectural graphics

**Track record counts, and the WW 300 Series has now been popular across the graphics market for 15 years, coping with extreme applications. It remains the product of choice because of its outstanding adhesion on the most challenging surfaces - like concrete and textured walls. This is the film that can stick reliably to extremely difficult walls, and look great when in place.**

WW 300 films are specially designed for medium-term indoor and outdoor decoration, with a high-tack adhesive that performs brilliantly on flat and demanding wall surfaces. The WW 300 Series can be paired with several Mactac laminating films, for different finishes and applications ranging from flooring to anti-graffiti solutions. We can't claim that these films are a 'universal' solution, but they come close!

## **Advantages**

- High-tack adhesive for strong adhesion on many different walls
- Thoroughly proven - 15 years in the market
- Great opacity from a grey adhesive
- Excellent printability on all main platforms
- Available in gloss and matt

# WW 300 Series

## Applications

- Medium-term applications
- Indoor and outdoor decoration
- Vertical and horizontal flat surfaces
- Difficult wall substrates
